## **A Tour of Apple iTunes 11**

iTunes is a FREE music and video jukebox program provided by Apple Computer. There are versions for Windows and for Mac OS.

iTunes lets you manage all your music and also can sync music to iPads, iPhones and iPods. It also integrates directly with the iTunes online store.

- **Where to get it?**  
<http://www.apple.com/itunes>
- **Demo downloading and installing iTunes.**
- **Walk through the updated user interface.**
- **Configuring iTunes views and settings.**
- **Rip (import) a music CD into a set of MP3 files.**
- **Set up a playlist of favorite songs.**
- **Copy that playlist's MP3 files to a folder (could be on a flash drive or attached tablet).**
- **Burn that playlist's songs to an MP3 CD.**
