DVDVideoSoft YouTube Video Download Tool

Free download from: www.dvdvideosoft.com

Install the program. It will place an icon on your desktop. Optionally, it will install an add-in to your browser

To use:

1. Find the desired YouTube Video using your web browser.
2. Copy and Paste the video's URL hyperlink to the download window in DVDVideoSoft (click the Paste button). You can set up several videos to be downloaded in a batch.
3. Specify which file format you want the videos saved in (MP4 recommended).
4. When ready, click the "Download" button.
5. The videos will download to your "Documents\DVDVideosoft\Videos" folder. (You can override this).
6. When done, select and remove the YouTube URLs from the download window.
7. The downloaded MP4 files can be moved to other folders and renamed to suit.
8. They can be "played" with Windows Media Player, QuickTime or VLC.
