Making Videos and DVDs Using Windows Movie Maker

How to get Windows Live Movie maker 2011 or 2012:

- Search with Google using search words:
windows live movie maker
- Click on the download link on Microsoft.com
<http://windows.microsoft.com/en-us/windows-live/movie-maker-get-started#t1=overview>
- Run the wlsetup-web.exe setup program

Steps:

1. Start Movie Maker 12
2. Use File > New to start a new video project
3. Import the move clips you wish to use in the slide show
4. Move the videos on the timeline into the desired sequence
5. Use the Edit menu to excise unwanted footage, playback speed
6. Specify transitions
7. Preview your video
8. Make any needed adjustments
9. Add titles, credits
10. Generate your finished video to a file (.MP4 or .WMV)
11. Burn your video to video DVD (on Win 7 use Save Movie > Burn DVD)

On Windows 8, you will need a separate program:
