Clonezilla

- Clonezilla is disk cloning and imaging program similar to Acronis®.
- Clonezilla is Open Source (freeware) software. To obtain Clonezilla go to the Clonezilla web site at:

<http://clonezilla.org/>

- Download the .iso file and burn it to a CD using a CD creation program like *Brasero*. (Select *Burn Image*) This will create bootable CD.
- Check the BIOS settings to boot from a CD.
- The Clonezilla interface is not as elegant as Acronis, but it does step-you-through to clone or image creation process.

Login Options

- Enable *root user* login
 - System -> Administration -> Login Window
 - Click on the *Security* tab
 - Check: "Allow local system administrator login"
- Enable Automatic Login
 - Startup without the prompts for userid and password
 - System -> Administration -> Login Window
 - Click on the *Security* tab
 - Check: "Enable Automatic Login"
