Ring Video Doorbell

Installation, Setup, Features

Topics

- Ring Video Doorbells Specifically Ring 4
 - Battery or powered options
 - Mounting Considerations
 - Go over some important settings
- Opening Ring account & installing app
 - Wi-Fi network name
 - Wi-Fi password
- Access, Review and Share, recorded video

Many types of Video Doorbells available

Ring Video Doorbells are quite popular and will be our primary focus today

Not all Ring doorbells have all the features shown here – it varies by model

Many of the features shown are also available on other brands of video doorbells

How it works.

Detect motion when people come to your property.

Receive notifications on your phone, tablet or PC.

- Install Ring App on Smartphone
 - App Store (iOS), Play Store (Android)
- Ring Log-In on PC
- Follow Step by Step instructions on App to complete installation
- Choose video storage plan in App

Fully charge battery prior to install – up to 12 hours

Can do setup from your desk easily prior to mounting

USB Charging Cable supplied

- Step One Download the Ring App
- Step Two Create or Log in to Your Account
- Step Three Tap "Set Up a Device"
- Step Four Scan the QR code or MAC ID barcode on your Ring device
- Step Five Specify your Location
- Step Six Name Your Device
- Step Seven Put your Video Doorbell into Setup Mode

• Step Eight – Connect to Your Ring Device

The Ring Wi-Fi network is a temporary access point that you join briefly during the setup of a Ring device. <u>After</u> you connect to the temporary Ring Wi-Fi network, you will connect to your own home Wi-Fi network. Then, you are no longer connected to the Ring network. Your smartphone may generate a message that says "no internet connection" or similar verbiage in the settings. This is not a cause for concern. You can safely join the temporary Ring Wi-Fi network access point and complete your setup.

Step Nine – Connect Your Ring Doorbell to Your Wi-Fi network

- Many Ring Doorbells will only use 2.4 GHz so choose accordingly if you have a dual band router
- Step Ten Test Your Device

Setup Ring Account

Looks like you're new! Welcome to Ring.

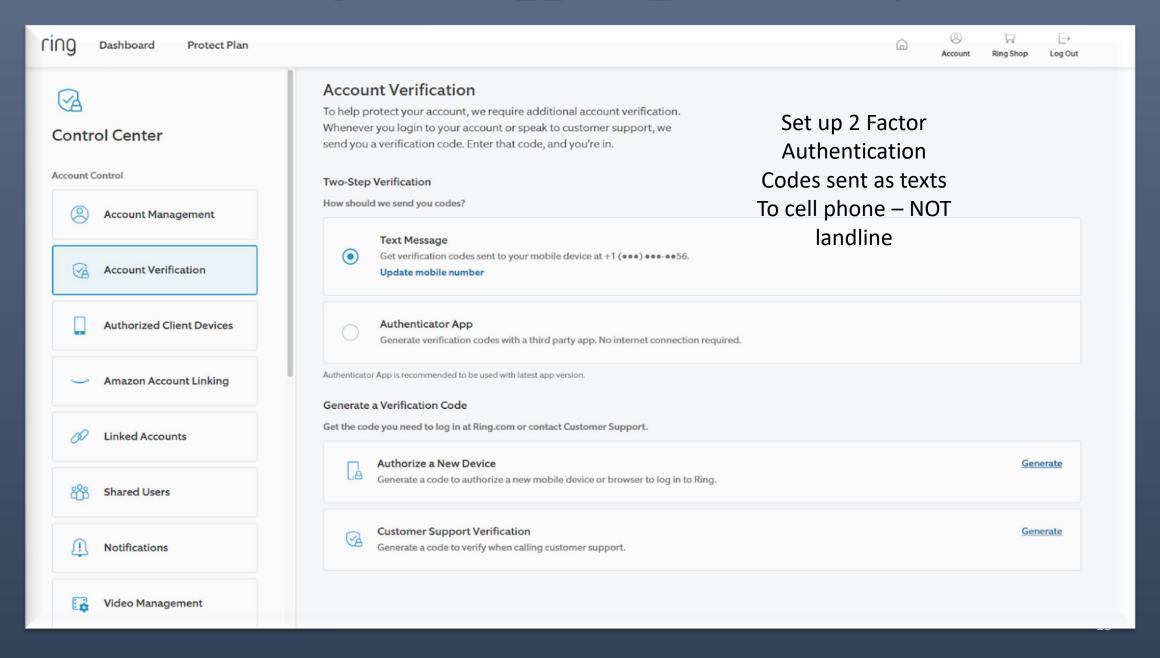

How can we help you get started?

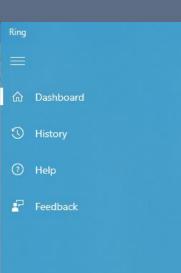

Setup Help

Get the Ring App

Shop for Ring

Create Ring Account – **2** Factor **A**uthentication, password

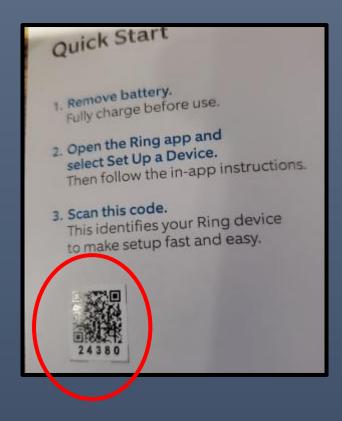

Add a Ring device

With Ring motion-activated security cameras, doorbells and security devices, you can see, hear and speak to anyone on your property from anywhere.

Setup a device

🛱 Settings

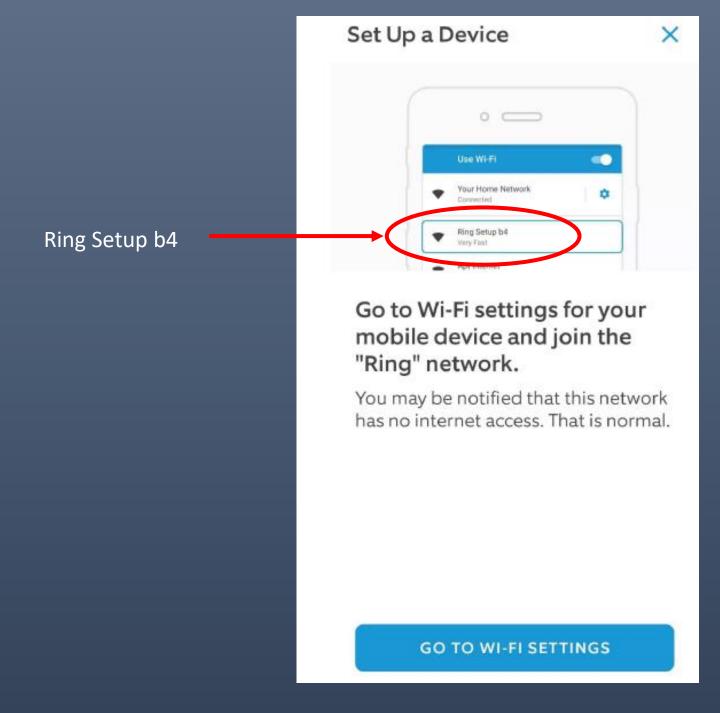

QR Code is in the included brochure – small sticker

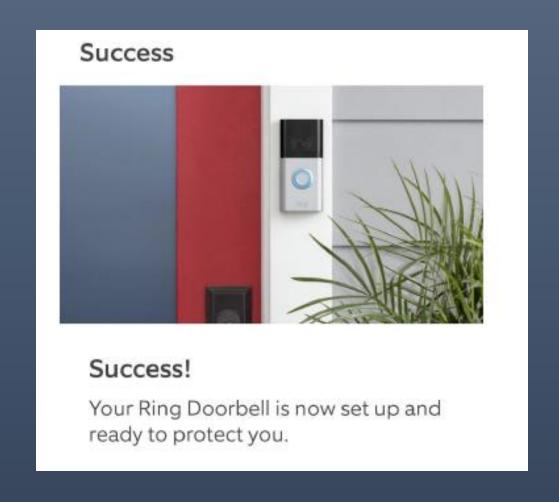

If you have trouble scanning the QR code, a five digit numerical code is shown below the QR code.

If your router has a guest network available, select that to isolate your smart device from your home network.

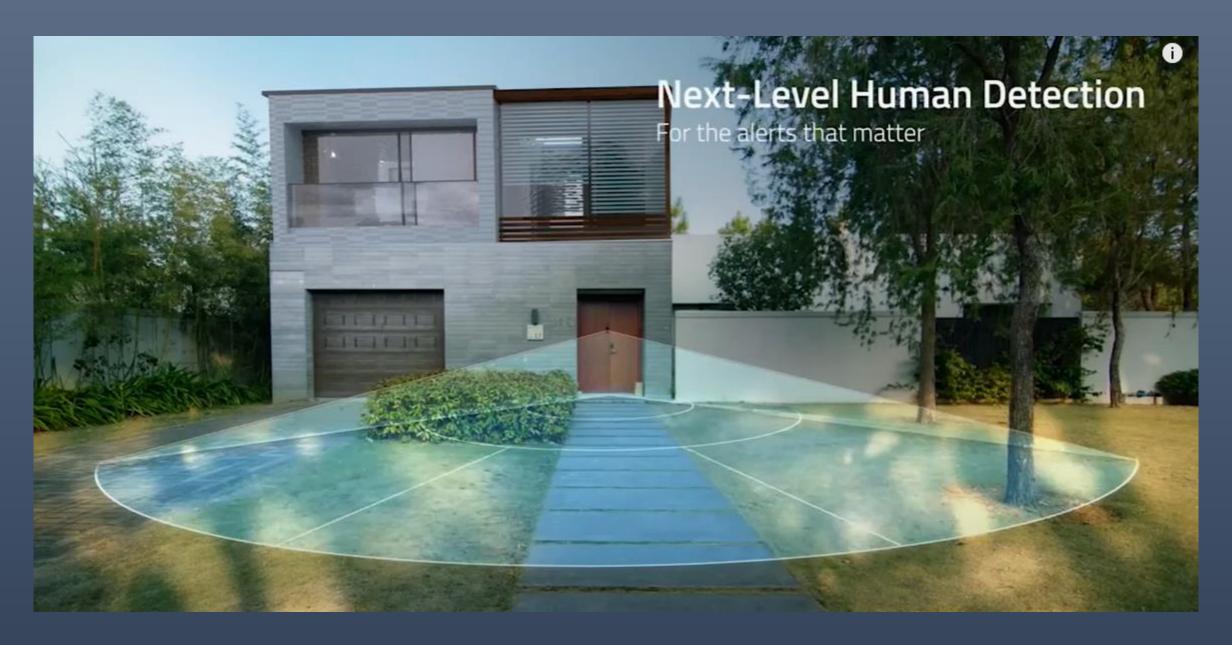

Work through the steps until you reach this screen

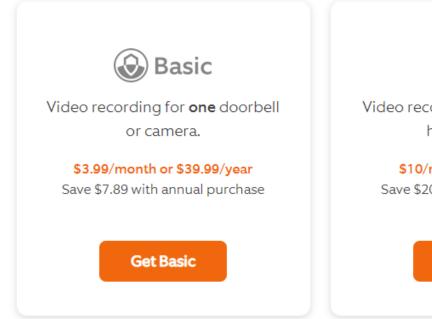

Decide on a location for the Ring Doorbell. If you have an existing doorbell button you can attach those wires to the Ring Doorbell Be aware of the field of vision. The Ring 4 comes with a mounting wedge to angle view

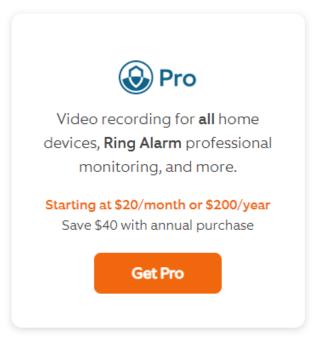

With a Ring Protect Plan, you can save, review, and share video recordings¹ from your Ring devices to your Ring account.

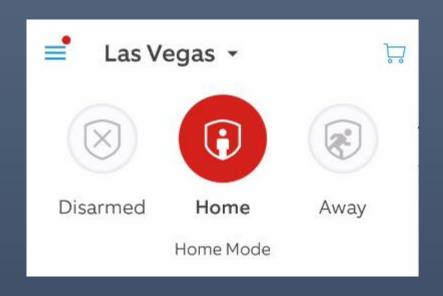

Choose a subscription that's right for you.

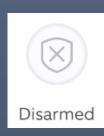

When you open the Ring app on your Smart Phone, you will see the current mode in red and the available modes

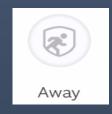

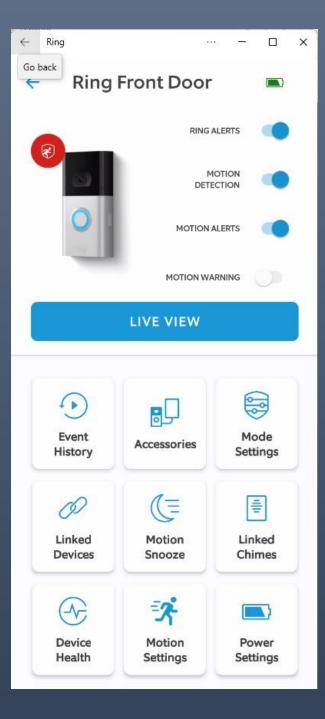

At home, motion sensor off on selected devices

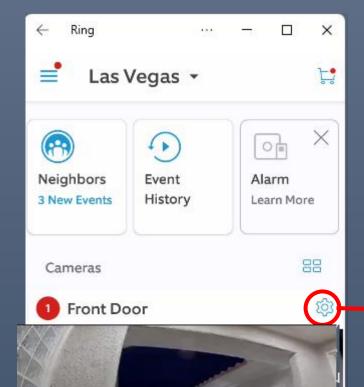

Outside cameras/doorbells activated, but want to be able to move freely inside your home.

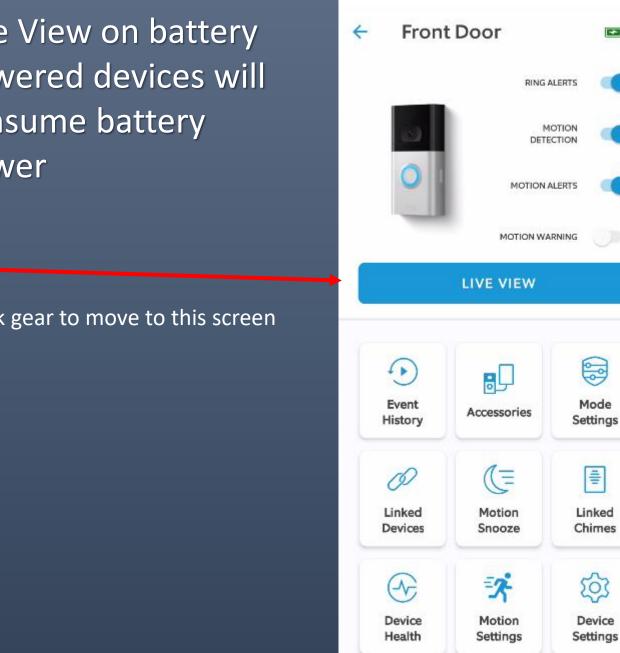

Away Mode to fully secure your house when you leave.

Live View on battery powered devices will consume battery power

Click gear to move to this screen

Ring

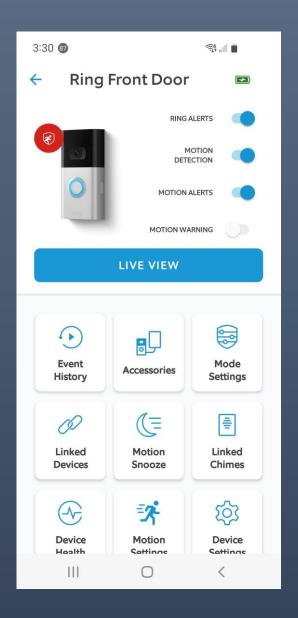

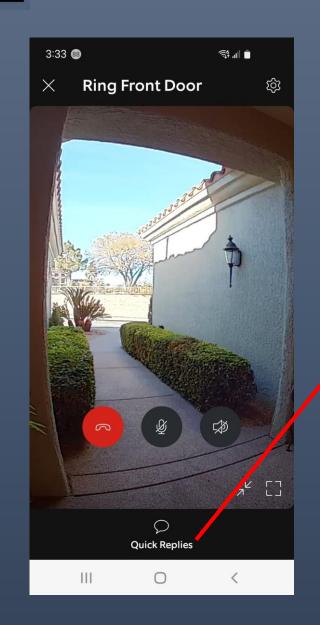

Live View

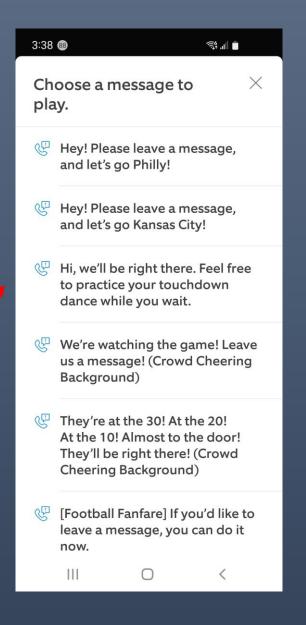

You can use this screen to converse

→ Devices → Ring Front Door → Smart Responses

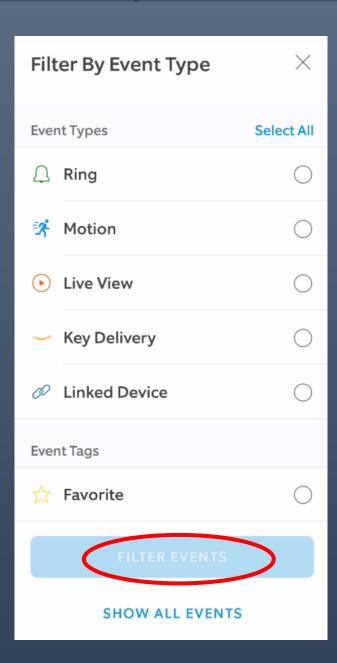

<u>Devices</u> → Ring Front Door → Event History

Look at history and filter by event Type.

Your Ring products work even better as a team.

Device linking lets you set up relationships between your Ring devices so they can work together to protect you.

For example, if one device detects motion, other devices can begin recording video or turn on their lights.

Suggested Devices

Security Cams

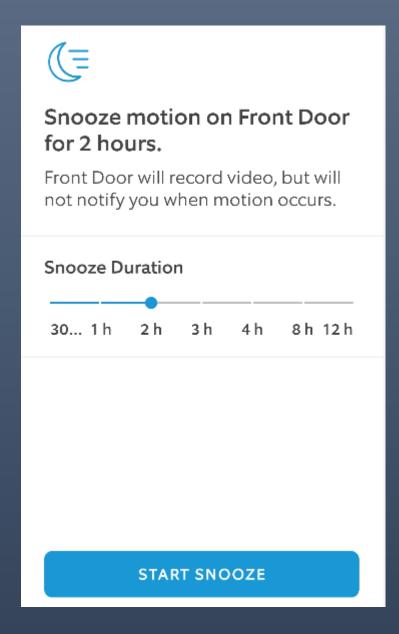

Can record video, turn on lights, and sound its siren when triggered.

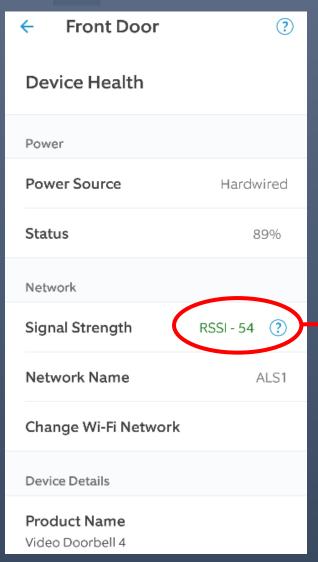

Smart Lighting

Can turn on lights when

Security Cams can trigger front door camera to record an approach to the front doorbell camera.

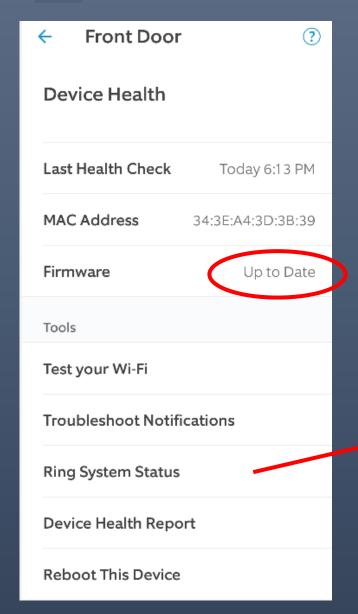

Snooze notification of motion at the Front Door

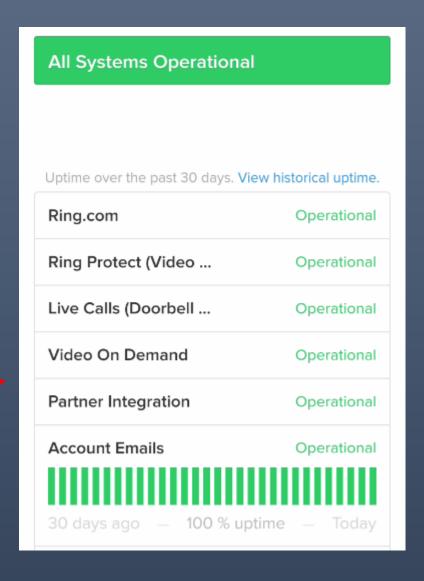

Check Wi-Fi Signal Strength

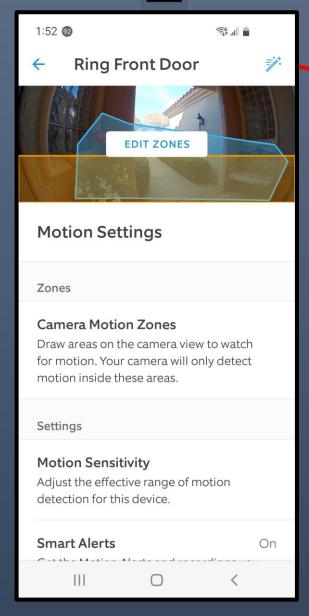

- Green Good
- Red Unusable
- Amber Needs improvement

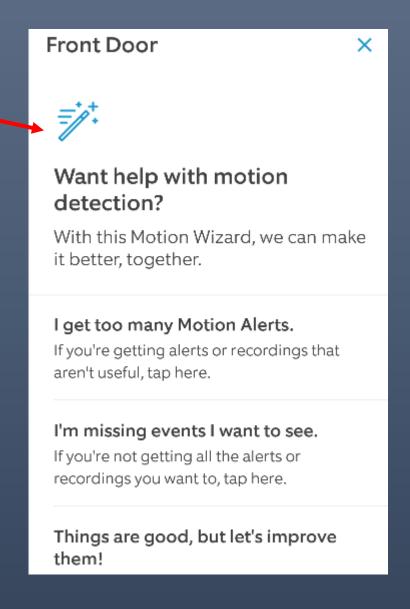

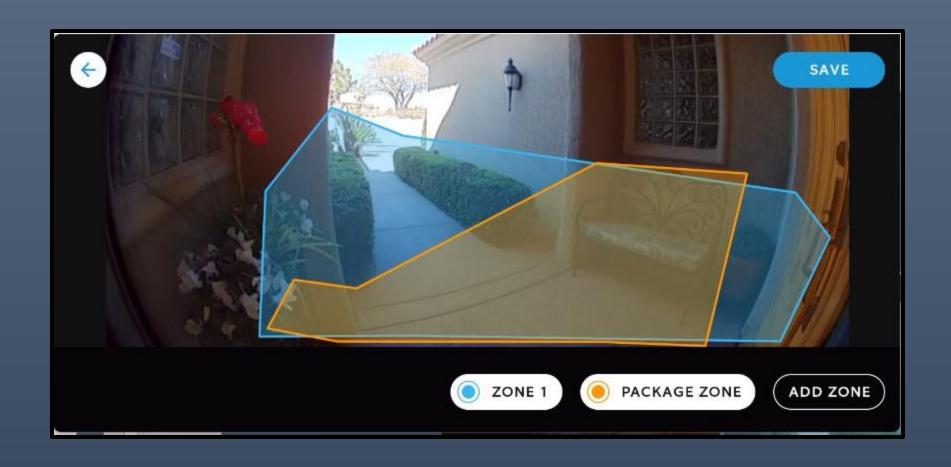

→ Devices → Ring Front Door → Motion Settings

Devices → Ring Front Door → Motion Settings → Smart Alerts → Package

Devices → Ring Front Door → Motion Settings → Smart Alert

Smart Alerts

On

Get the Motion Alerts and recordings you want, and ignore the rest.

Smart Alerts

For each type of event, you can get alerts, recordings, both, or neither.

Motion Zones

Person

Record and send alerts

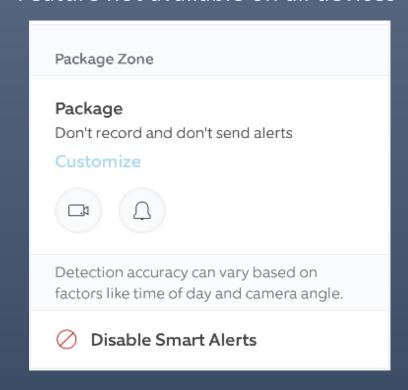

Other Motion

Record and send alerts

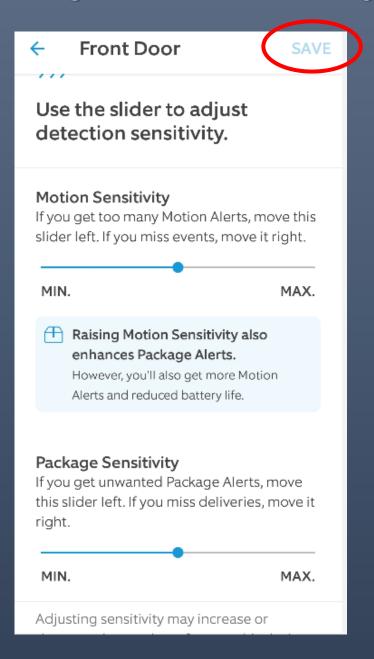

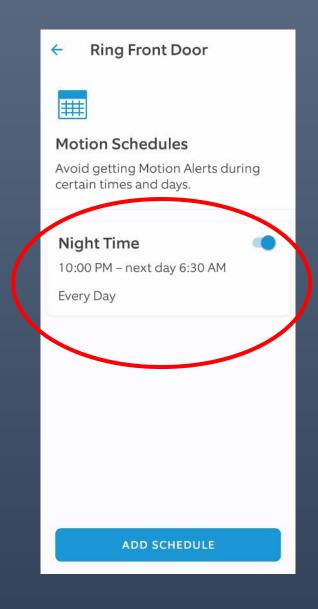

Feature not available on all devices

Devices → Ring Front Door → Power Settings

Advanced Motion Detection in Ring Devices

Ring devices have the capability to use Advanced Motion Detection, on by default for new setups.

Advanced Motion Detection

Ring video doorbells use <u>Advanced Motion Detection</u>, which includes <u>Person and Other Motion Detection</u> to differentiate motion between people, objects, or animals. Once motion is detected, you will receive a notification in the Ring app, and your device will start recording.

Tip: If you have a video doorbell, Advanced Motion Detection is already set to "On" by default. If you turn it off, you'll lose Customizable Motion Zones, trimming of recordings, and possibly some detection accuracy.

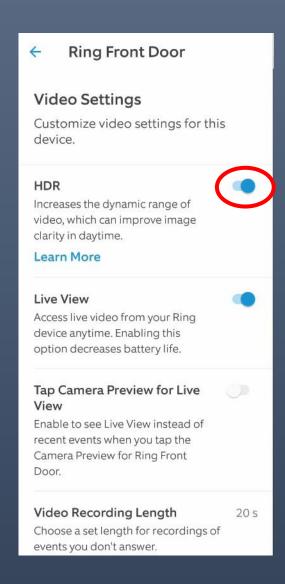

Motion Zones in the Ring App

Motion Zones let you focus on specific areas that you want your Ring device to cover. By customizing these zones, you can reduce the number of false motion alerts, such as cars driving by or trees moving in the distance.

Under <u>Motion Settings</u>, you can adjust and edit the zones of your video doorbell under Edit Motion Zones. You can also adjust your device's motion sensitivity and turn Smart Alerts on and specify only the Motion Alerts and recordings that you want.

To find out more about Customizable Motion Zones for video doorbells, click here.

Devices → Ring Front Door → Device Settings → Video Settings

Used for bright background issue

Use on powered – high drain on battery power

Set 15 seconds to 120 seconds

Notification Settings

Notifications

Rich Notifications

See what is going on at your door without opening the app.

Audible Alerts

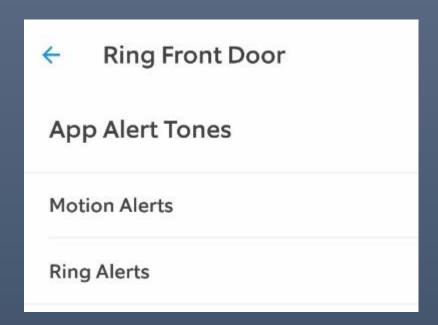

App Alert Tones

Choose the alert tones the app plays for this device.

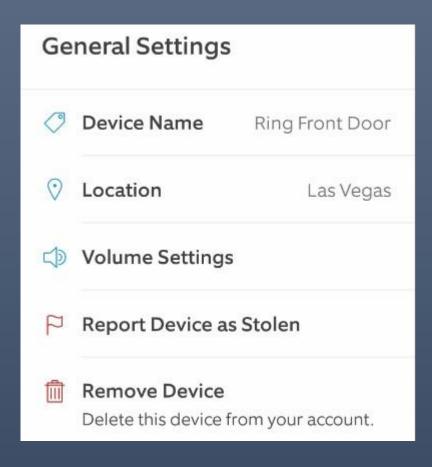

Linked Chimes

Select the alerts Chime should play for this Video Doorbell 4.

Set Silent or Alerts → Set choose sound and /or Vibrate

Choose unique device name, adjust volume of doorbell ringer, remove device → keep or delete events recorded

Devices → Ring Front Door → Smart Responses

Smart Responses

Let your Video Doorbell 4 help with greeting and managing visitors when you're not available.

Learn More

Quick Replies

Quick Replies

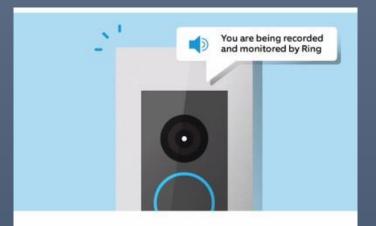

Response Time

Set how long Quick Replies should wait (after the doorbell tone) before it answers the door for you.

25

Quick Reply Message

We can't answer the door right now, but if you'd like to leave a message, you can do it now.

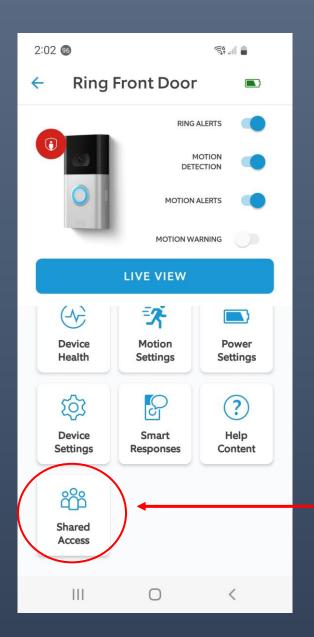

Let Quick Replies answer the door for you.

This feature lets your Ring Doorbell play preset greetings and take messages from visitors when you're too busy to answer.

Think of it as of an answering machine for your door.

Note that only Ring Protect Plan subscribers will be able to access and review messages left by visitors in their video History. All users can view visitors' messages in real time in Live View.

Share device(s) – Enter email address to grant access

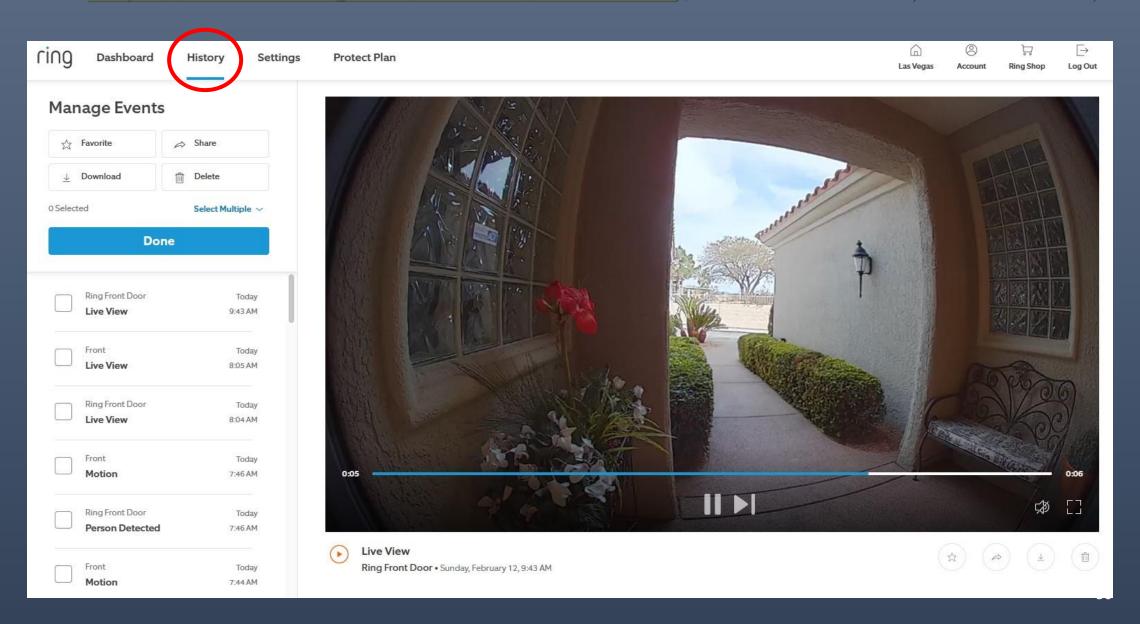

Shared Access with multiple people

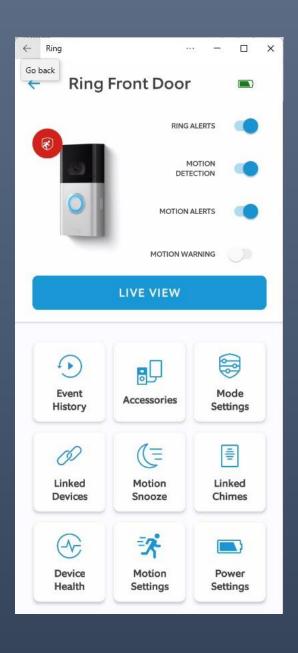

Now we have the Ring Doorbell setup, and we have explored some of the features –

How do we view and share the images and recorded videos?

To View recorded video on your **PC**, log into your Ring account:

• https://account.ring.com/account/dashboard, select the history tab at the top

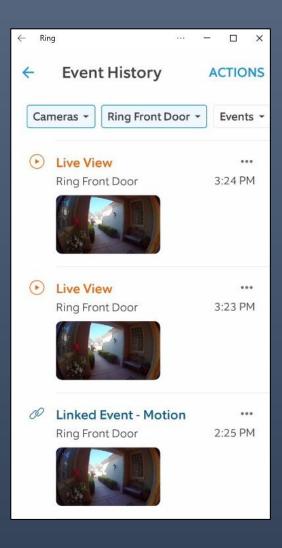

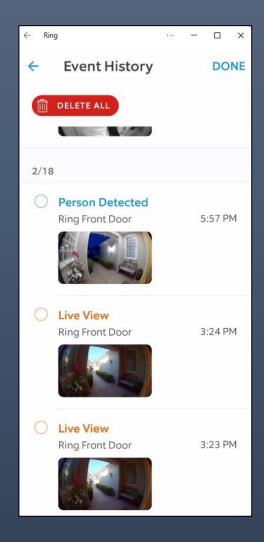

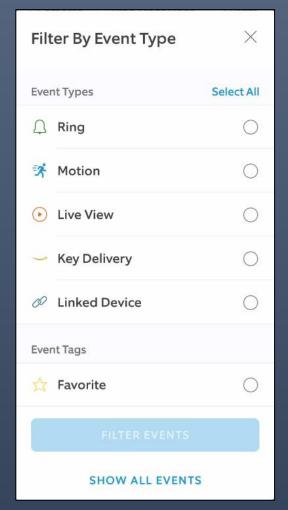

To view recorded videos on you Smart Phone, log onto the Ring app and go to Devices from the icon in the upper left and select the device you which to view.

Event History show you recorded videos by date and time, with choices to Share, Download, Star, or Delete

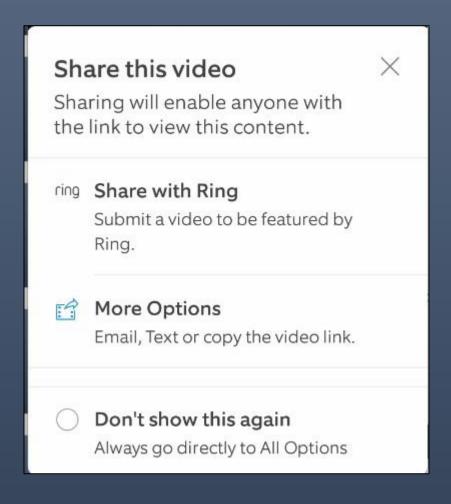

Viewing Videos on you Smart Phone

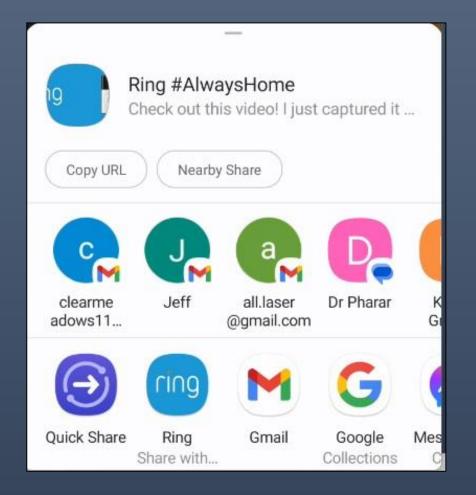

If you want to share a video, More Options and you can copy the URL, email, send in a message etc.

Devices → Ring Front Door → Event History

Video Stored in Ring account

Connect to Amazon Alexa environment

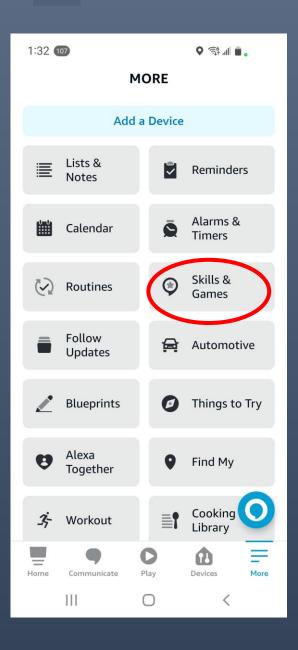

Echo devices can ring when doorbell pushed

Echo Show can display image from Ring camera

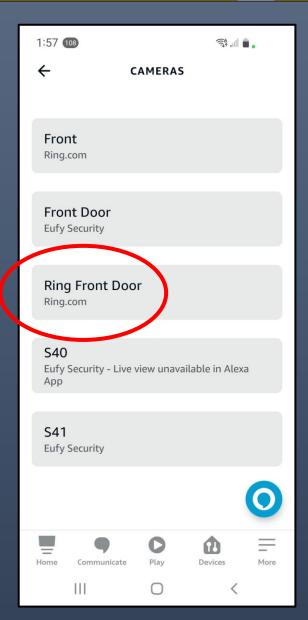

Alexa will let you know with a voice announcement and display a live view of your Ring camera feed on your Echo Show, Fire TV, or Fire Tablet.

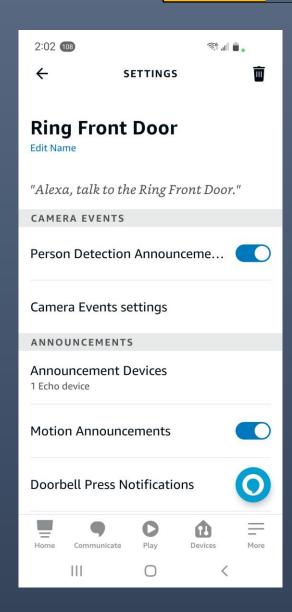

Alexa → Skills & Games

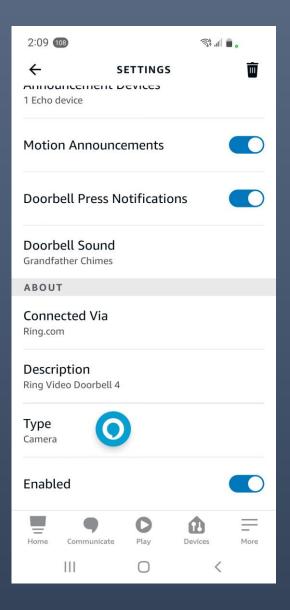

Alexa \rightarrow \Rightarrow Skills & Games \rightarrow \Rightarrow Cameras

Alexa \rightarrow \longrightarrow Skills & Games \rightarrow \longrightarrow Cameras \rightarrow Settings

View on Amazon Echo 5

But wait.....

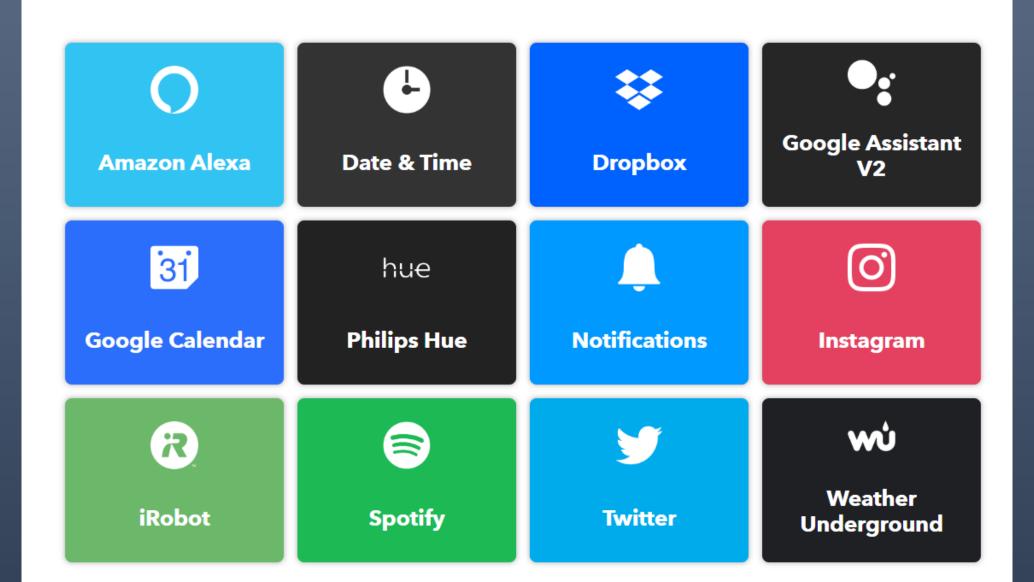

Next time.....

Ring Neighbors App

- Real-time crime and safety alerts from your neighbors and public safety agencies.
- Reports on the Neighbors App, a package thief was arrested, hundreds of packages found.
- Fire in California residents fled the flames, Neighbors App informed & connected with real-time updates from their communities.
- Charlie is a helpful beagle who provides support to autistic kids in Atlanta. After going
 missing for three weeks, Charlie was tracked down and returned to her owner by helpful
 community members using the Neighbors App.
- Get real-time crime and safety information about your neighborhood from an official source.
