WINDOWS VISTA UPDATING SEMINAR (PART 2)

H. E Doyle

The Difference between WINDOWS UPDATE and MICROSOFT UPDATE

Windows Update ONLY updates the Windows (XP or Vista) operating system.

Microsoft Update updates ALL installed Microsoft programs.

(Exception: Internet Explorer [browser] is updated automatically by Microsoft.)

NOW, a secret

MICROSOFT UPDATE MUST BE INSTALLED (and how to)

Click Start Orb, Windows Update

“You receive updates: For Windows Only.” (if Microsoft Update is not installed)

“Get Updates for more products”

(Click to install Microsoft Updates, Check “I accept Terms of Use”, Click Install),

Or

Microsoft Update (Must install for ALL versions of Vista.)

“You Receive Updates: For Windows and other products from Microsoft.”

This provides updates for all installed Microsoft programs. (Windows Vista, Defender, Office, Works, etc.)

Optional Updates: All hardware updates should ONLY be installed from the web site of that device.

Click Install Updates

“Preparing Restore Point”

“The updates were successfully installed.”

Close window.
